

CNSA107 PC Hardware and Support Fundamentals

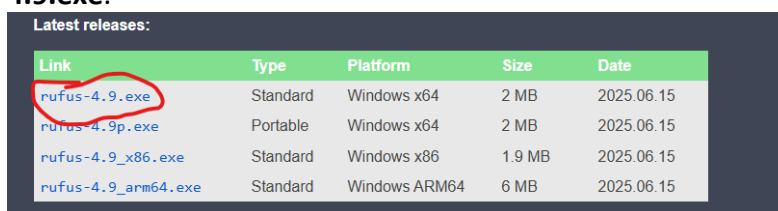

Installing Windows 10

Goal: Use your bootable USB created through Rufus or use the Microsoft Media Creation Tool to create a bootable USB and install Windows 10 on one SSD in the Custom PC.

Do NOT use a Microsoft account for the installation. Create a local user account during the install.

Document your process in a professionally formatted MS Word document. Include details for each of your steps. Imagine that you're creating a document that will provide instructions to someone who has never done this before. Consider including:

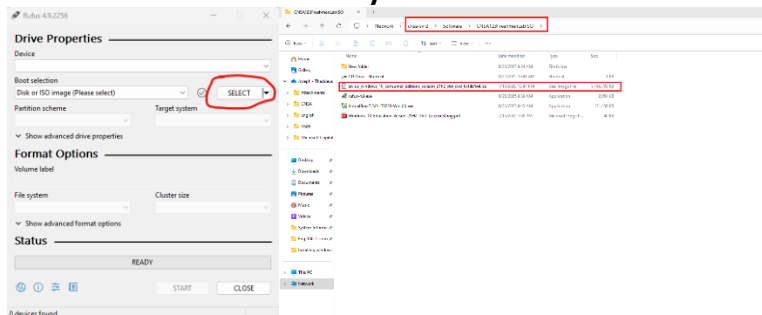

Where did you find the Media Creation Tool? Or where did you get Rufus and how did you use it?
Searched Rufus download on google then in the first option scrolled down and selected rufus-4.9.exe.

Link	Type	Platform	Size	Date
rufus-4.9.exe	Standard	Windows x64	2 MB	2025.06.15
rufus-4.9p.exe	Portable	Windows x64	2 MB	2025.06.15
rufus-4.9_x86.exe	Standard	Windows x86	1.9 MB	2025.06.15
rufus-4.9_arm64.exe	Standard	Windows ARM64	6 MB	2025.06.15

How did you get the setup files (Media Creation Tool only)?

Got the files off the cnsa server by searching [\\cnsa-svr2\Software](#) in the network tab. Went into folder called CNSA123FreshmenLABISO, and copied file named en-us_10_consumer_editions_version_21h2_x64_dvd_6cfdb144.iso onto desktop, then I dragged it into where the rufus tab says 'select' and started download onto flash drive I had plugged in.

What do you look for/select/click/etc. during the process?

Made sure to click on correct options and then clicked next

What questions did you answer during the installation?

If I had an installation key, what version of windows I wanted, region, keyboard set-up, wi-fi connection, local username setup, local password set up, security questions.

How did you confirm the installation was good?

Went into settings and made sure it had properly added local users.

Did you encounter any issues during the installation?

Yes, my solid state drive was not plugged all the way in at first so I had to restart the process.

The Media Creation Tool and the Windows setup files are free to download online (make sure you go to a respectable site) if you choose to use this method.

Have your instructor confirm your installation.

Submit your completed lab to the Canvas assignment.
